Version 1.0

Network: Base (Ethereum L2)

Token Standard: ERC-20

Total Supply: 1,000,000,000 (Fixed)

1. Introduction

Phygitoken (\$PHYG) is the native utility token powering the Phygilink ecosystem--a

blockchain-based platform that bridges the gap between physical collectibles and verifiable digital

ownership. As Web3 evolves, the demand for secure and transparent collectible authentication

grows. Phygilink provides a seamless system to link real-world items with NFTs via NFC-enabled

tags, with \$PHYG serving as the digital fuel behind it all.

2. Purpose of \$PHYG

\$PHYG is not a meme or speculative token. It is a real utility token designed for:

- Authenticating and verifying physical collectibles.

- Powering NFT upgrades and enhanced metadata.

- Unlocking exclusive drops, collectible fusions, and community perks.

- Facilitating future discounts and ecosystem benefits inside the Phygilink Marketplace.

3. Why Base?

The Base network (an Ethereum Layer 2) was selected for its low fees, developer ecosystem,

Coinbase integration, and ease of use for crypto-savvy collectors. Deploying on Base allows \$PHYG

to remain affordable, scalable, and accessible to a growing Web3 user base.

#### 4. Tokenomics Overview

Total Supply: 1,000,000,000 (fixed, no inflation)

- Community Presale: 40%

- Founders & Team: 15%

- Ecosystem Rewards: 15%

- Marketing & Airdrops: 10%

- Liquidity Provision: 10%

- Advisors & Partners: 5%

- Treasury / Reserve: 5%

Decimals: 18

Contract Type: ERC-20 Standard

#### 5. No Friction Token Model

To ensure trust and adoption, \$PHYG includes no transaction taxes, burn fees, reflections, or buyback mechanics. It is designed for pure utility and simplicity, maximizing integration flexibility across third-party platforms, NFT marketplaces, and wallets.

# 6. Presale Details

- Hard Cap: \$500,000

- Minimum Contribution: \$25

- Accepted Currencies: USDC (or ETH/BASE)

- Max Wallet Allocation: 2% of total supply during presale

- Dynamic Pricing: Tiered entry pricing (first-come, first-served)

# 7. Use Cases & Ecosystem Integration

- Enable premium features within collectible vaults
- Upgrade NFC-backed NFTs with enhanced media and metadata
- Unlock limited edition tag drops and content
- Act as fuel for future marketplace perks and governance options

### 8. Future Roadmap

#### Q3 2025:

- Launch presale & distribute \$PHYG tokens
- Finalize NFT + NFC integration for marketplace
- Begin smart contract audit process

#### Q4 2025:

- Launch Phygilink Marketplace (Beta)
- Activate token-based perks & upgrade system
- Release collector dashboard with NFT fusion tools

# 2026 and beyond:

- Expansion into new categories (art, memorabilia, luxury goods)
- Introduce DAO-based governance (optional future utility)
- Launch multi-chain bridge if needed

# 9. Legal & Disclaimer

\$PHYG is a utility token and does not represent equity, ownership, or security in TapTech Digital, Phygilink, or any affiliated entity. Participation in the token sale is voluntary and subject to local laws. This whitepaper is not financial advice.

# 10. Final Notes

Phygitoken is designed to power a specific niche: collectors who value digital permanence, authentication, and next-gen ownership. With a fixed supply, modern L2 infrastructure, and clear roadmap, \$PHYG aims to be the foundational asset behind the Phygilink collector experience.
